

# SIMBODIES<sup>®</sup>

Realistic training. Real **life-saving.**

PART OF SAFEGUARDMEDICAL™

# Because of **SIMBODIES,**

you arrive on-scene with the best chance of saving lives. Because of SIMBODIES, you're equipped with the most **realistic training, the greatest precision, and the utmost** certainty. Because of SIMBODIES, you know exactly how the human body works and responds in trauma. Because of SIMBODIES, a mother will start breathing again. An officer will one day walk again.

SIMBODIES is realistic training. Real **life-saving**.

# EMERGENCY MEDICAL SKILLS - MANIKIN (EMS-MAN)

IMPROVE YOUR LIFESAVING SKILLS ON THE WORLD'S  
MOST HYPER-REALISTIC ADULT MEDICAL MANIKIN

The best medical training starts with simulation. And the best simulation is the closest to real patients and real injuries as humanly possible. SIMBODIES, a Safeguard Medical company, is the global leader in advanced medical simulation and moulage to present any training scenario. As game-changers in the first responder industry, we help support and increase training in any trauma situation giving trainees a hyper-realistic experience like nothing else.

**“The closest thing to an actual patient that I’ve ever seen.”**

## **It not only looks like a real human; it works like one too.**

Our medical manikins are hyper-realistic human replicas both inside and out. Each item created by SIMBODIES is hand-produced from the very start of their production to the moment they leave our warehouse. Thoughtfully designed and detailed by clinical experts, scientists, and artists, SIMBODIES manikins are easy to maintain and built to last. Made of the highest quality, most innovative materials including skin-safe, ultra-resilient prosthetic grade silicone, if taken care of as directed, they can be reused and repurposed for a multitude of training scenarios.

## **Because training isn’t confined to classrooms, neither are these manikins.**

SIMBODIES are built to withstand conditions on the street or wherever you’re needed. Heavy enough to feel like an actual human body, yet light enough to be transported, the manikins allow for invaluable on-scene practice and extensive training opportunities including airway management, catastrophic bleeding, and wound control.

# Our EMS-Man features include:

Built in/removable speaker to play or replicate human sounds

Blood filled Intraosseous (IO) sites

Both exterior and interior features are molded from actual human anatomy

Feature medical capabilities using the replication of veins, casted airway, floating jaw, ceramic teeth and anatomically correct body and landmarks

Flexible limbs

Advanced Life Support (ALS) clinical capabilities, including an accurate human casted cadaver airway

Splashproof & washable skin for easy maintenance.

Human hair wig plus body hair (genitals)

Lung bags that can be ventilated

Stop the bleed capabilities with a packable wound and lower leg amputations

Closed eyelids for manual opening

Anatomical landmarks in airway, chest & pelvis

# EMS-T TRAINER

The most advanced, compact, multi skills torso trainer.

Our life-like EMS-T trainer is a half body, hyper-realistic portable and compact clinical skills trainer, featuring over 30 intended medical procedures including:

*CADAVER CASTED AIRWAY CAPABLE OF INTUBATION AND VENTILATION*

*SURGICAL AIRWAY CAPABILITY*

*NASAL PASSAGES*

*INTRAOSSEROUS (IO) INFUSION IN THE HUMERAL HEADS*

*NEEDLE DECOMPRESSION*

*CHEST DRAINS*

*FLOATING JAW AND CERAMIC TEETH*

*ANATOMICALLY CORRECT BODY AND LANDMARKS INCLUDING  
REPLICATION OF VEINS*

*LIGHTWEIGHT AND INCLUDES A CASE FOR EASY PORTABILITY*

# THIGH, SHOULDER WOUND PACKING TRAINER, FULL LEG MAJOR TRAUMA TRAINER

Our hyper-realistic multifunctional wound trainers address specific medical procedures and work with a wide range of gauzes, bandages, tourniquets, and other medical bleed control applicators. All have splash-proof and washable skin for easy clean up.

## THIGH, SHOULDER WOUND PACKING TRAINER

Sized and shaped like actual human thighs and shoulders, these trainers are designed to teach catastrophic bleed control and gunshot wound management. Each features two wounds with bleeding tubes to simulate hemorrhage, along with a large cavity and smaller through-and-through gunshot wound for packing training.

## **FULL LEG MAJOR TRAUMA TRAINER**

With its lifelike look, feel, and weight, the Full Leg Major Trauma Trainer enables you to have an immersive experience practicing tourniquet application as well as hemorrhage and gunshot wound management. It features large cavity wounds and integrated bleeding tubes to simulate catastrophic bleeding using a manual pump.

# WOUND SLEEVES AND MOULAGE

From everyday injuries to the unfathomable.

We offer the widest range of durable, reusable wound sleeves and non-staining moulage kits that can be used on our manikins and/or live role-play actors in any environment.

Our simulation sleeves are quick to apply and simple to clean. Made from skin-safe prosthetic grade platinum silicone, they create a thin, flexible and elasticated representation of human skin.

Moulage kits are designed to simulate blood and enhance the realism of injuries on SIMBODIES manikins, Simulation Sleeves, Simulation Wounds, or human skin. All of our moulage products are formulated to be skin-safe and non-staining on SIMBODIES manikins. This allows you to simulate complex wounds without leaving a trace of product, helping maintain realism for future training and longevity of use.

# SERVICE AND SUPPORT

In addition to our standard 1-year warranty, SIMBODIES offers two restoration program options to ensure the longevity of your manikins.

## 12-STEP RESTORATION PROGRAM SINGLE YEAR (1)

Customer will be entitled to 1 EMS-MAN restoration within 12 months of receipt of their manikin.

## 12-STEP RESTORATION PROGRAM MULTI YEAR (3)

Customer will be entitled to 3 EMS-MAN restorations. 1 per year for 3 years from receipt of manikin. For more peace of mind this is our recommended option.

### 12-STEP RESTORATION INCLUDES:

- Shipping collection & return
- Full Body assessment, deep clean and sanitize
- Wig wash & replenish
- Facial features and skin refresh, eyes & socket clean & eyelash replace
- Full body superficial skin repairs
