

# Experience the difference a pivoting head makes.

## Safe for patients. Easy for you.

The surgical clipper with a pivoting head that helps you give patients a safe, comfortable clipping experience. The pivoting head conforms to body contours, skin folds and creases.

- Has a nick rate of less than 2 percent, helping to reduce the risk of SSIs.<sup>1</sup>
- Approximately 160 minutes of run time on a four-hour recharge.
- Ergonomic design that's easy to hold.
- Battery indicator light shows when it's time to recharge.
- Also available: the 3M™ Surgical Clipper Specialty Blade 9690 for head and heavy body hair removal.

**3M™ Surgical Clipper 9661L with Pivoting Head**  
for use with the 3M™ Surgical Clipper Blade 9660

# Easy to charge, use and clean.

## Changing blades

### Attach

Remove backing from the blade packaging, hold the clipper at a 45-degree angle and snap on single-use blade 9660.

**Note: An audible snap indicates that the blade is securely attached.**

### Remove

Use your thumb to “pop off” the used blade into a sharps container.

**Note: Always use a new blade for each patient to avoid cross-contamination.**

## Clipping

### Push

Position the clipper like a pencil with the clipper blade flat or at a slight angle on the skin surface. Gently push the clipper forward, against the direction of the patient’s hair growth.

**Note: Do not use excessive pressure to push the clipper down on the patient’s skin.**

### Pull

Position the blade flat or at a slight angle on the skin surface and gently pull the clipper toward you.

**Note: Do not rake the blade across the patient’s skin.**

## Cleaning options

### Submerge<sup>2</sup>

With the clipper in the “off” position and the blade removed, soak the clipper in water. Ensure clipper is thoroughly dry before recharging or reusing.

**Note: If choosing to rinse or submerge, rinsing or submersing should be done prior to disinfecting.**

### Or rinse

With the clipper in the “off” position and the blade removed, rinse the handle under running water. Ensure clipper is thoroughly dry before recharging or reusing.

### Then wipe

With the clipper in the “off” position and the blade removed, wipe the clipper handle with a disinfectant.

## Charging

Before initial use, charge clipper for 4 hours. After each use, store the clipper handle in the “off” position in the plugged-in charge stand. Clipper provides approximately 160 minutes of run time on a 4-hour recharge. When charged, the light will be green. When battery needs recharging, and during recharge, the light will flash amber. Refer to package insert for warnings and more detailed instructions.
