Shelf-Life of Opened Product Statement

October 20, 2023

To Whom It May Concern,

Because there are a number of factors that Hydrox Laboratories cannot control once a product is opened, we cannot make assertions for the shelf life of opened products.

Factors that can shorten the shelf life of any product include: exposure to contaminants, length of time the product is left open and if the closure is tightened securely.

With the above being the case, the only official statement Hydrox Laboratories can make is that 3% Hydrogen Peroxide and 70% Isopropyl Alcohol have an expiration date of two (2) years from the date of manufacture, if unopened.

If you have additional questions or concerns, please feel free to contact us at: (847) 468-9400.

Regards,

A handwritten signature in black ink, appearing to read "Mark Vranich".
