

Quik-Connects™

Disposable Oxygen Connections

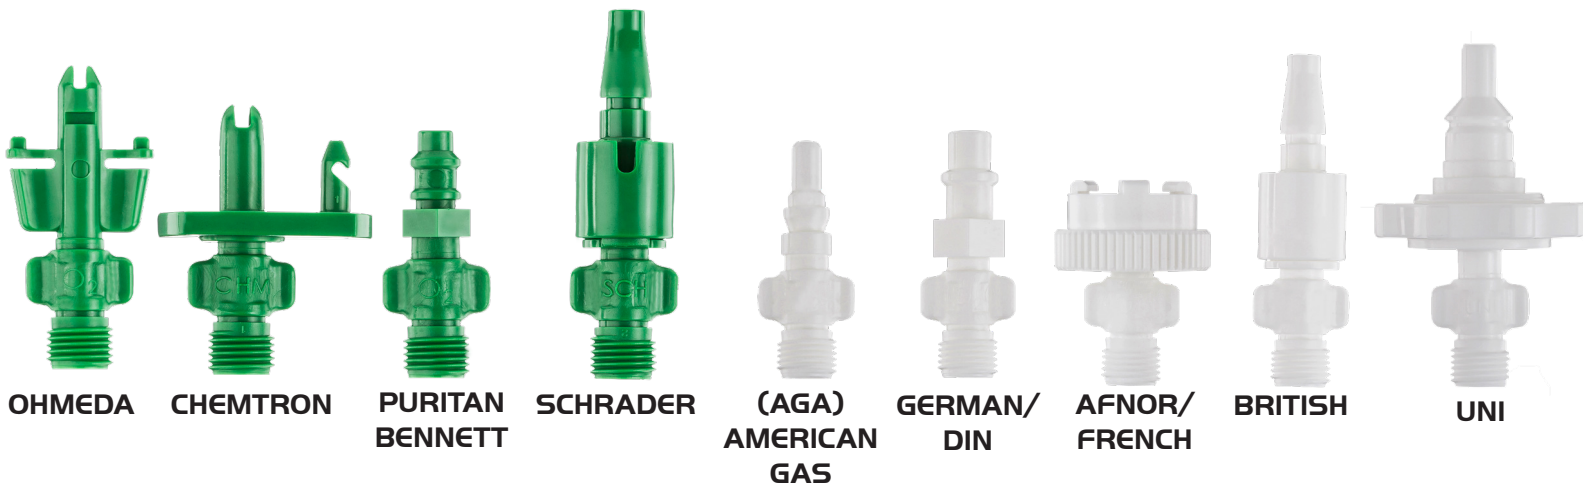

Connect to an oxygen source instantly with the Quik-Connects. These single-use disposable DISS gas fittings are designed to be used with the O2-MAX to prevent cross-contamination. They are available in 9 different fittings. The Quik-Connects are categorized into two colors, green is primarily used in the United States and white for international. These disposable, single-use products can quickly transition a patient from bedside to the ambulance and between hospital rooms.

Disposable & Single-Use

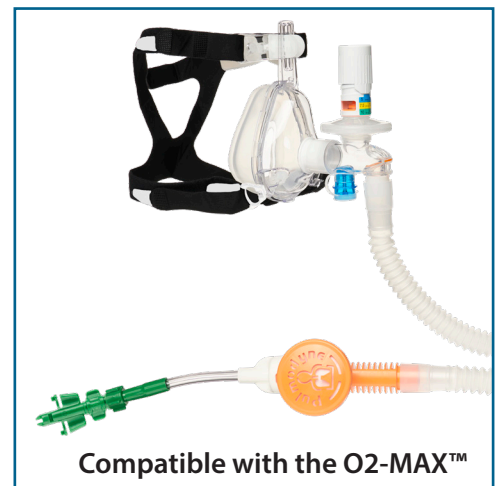

Compatible with O2-MAX

Cross-contamination prevention
