PUTTING RELIEF IN YOUR HANDS[™]

BURN JEL®

MADE SPECIFICALLY TO RELIEVE THE PAIN OF MINOR BURNS.

Minor burns can be extremely painful. That's why so many safety professionals nationwide keep plenty of Burn Jel close at hand. You'll find Burn Jel in first aid kits, medicine cabinets, ambulances, kitchens, offices, industrial plants, anywhere that minor burns can cause major problems.

Burn Jel is a topical cooling gel with the pain relieving ingredient lidocaine. It cools the burn, soothes the skin and eases the pain immediately upon application. Unlike petroleum based products which can trap the heat, Burn Jel

actually draws the heat out of the wound and begins dissipating it on contact.

And because we know that in the workplace, a minor burn can strike at any time, we've made it easy to carry relief with you, all of the time. Our unit-dose packs are small enough to fit in a pocket and are available in boxes of 6 for small kits, or in our handy 25-pack dispenser box for larger kits, medicine chests and first aid stations. Burn Jel is also available in a convenient 4 oz. bottle.
