

THE KING OF SLING.
WHILE DESIGNED AS A LOW-
PROFILE MED PACK WITH
SURPRISINGLY ROBUST
STORAGE, THE G3
MEDSLINGER ALSO DOUBLES
AS A GREAT PERSONAL BAG.

Built for medics opposed to traditional double shoulder-strap packs, ergonomics are not sacrificed as it wears exceptionally well and *slings* quickly off and on for easy use in stressful scenarios.

-  ACLS (Advanced Cardiovascular Life Support)
-  BVM (Bag Valve Mask)
-  BLS (Basic Life Support)
-  PAL (Pediatric Advanced Life Support)

G3+ Medslinger

G3+ Medslinger Construction

The G3+ Medslinger sling design allows you to swing the pack in front of you for quick access to contents without removing the pack. The quick-release adjustable buckle on the shoulder strap provides a custom fit and quick in and out. The EMS sling bag is organized into two main zipper compartments. Each of them are organized with transparent and mesh pockets for superior organization, quick viewing, and easy access. The large silicone rings attached to the ends of our zippers make zipping and unzipping quick, simple, and hassle-free. Not only can the Medslinger be used as an EMS sling bag, but it also works as a fantastic personal bag.

Cutting-Edge Material Innovation in Our EMS Sling Bags

The advanced high-performance elastomer utilized in our EMS sling bags represents the forefront of material technology. This material offers a distinctive amalgamation of mechanical, physical, and chemical characteristics, all validated to meet the most stringent final applications.

These attributes encompass:

- **Exceptional Tensile Strength:** Our material surpasses the tear resistance of most conventional elastomers, ensuring that your EMS sling bag remains resilient and steadfast in the most challenging and demanding scenarios. Concerns about tearing or deterioration become a thing of the past.
- **Unmatched Durability:** With durability exceeding that of rubber by more than threefold, this material stands resilient against rigorous physical abuses, such as scratches, friction, and corrosive interactions. Rest easy knowing your bag won't succumb to unsightly scratches.
- **Superior Flexibility:** Even in extremely cold temperatures, the dynamic flexibility of our material allows it to withstand intense external forces with remarkable ease.
- **Robust Microbiological Shield:** Our material boasts exceptional resistance to microbiological assaults, a crucial attribute for EMS packs subjected to constant exposure to blood and bodily fluids.
- **Heat and Weather Endurance:** Unlike conventional elastomers that degrade under UV radiation and heat, our material maintains its integrity across a broad temperature range, offering unparalleled safeguarding even in severe climatic conditions.
- **Chemical and Oil Resilience:** Our material remains impervious to chemical reactions, ensuring oil contamination poses no threat.
- **Unparalleled Biocompatibility:** Demonstrating exceptional biocompatibility, our material finds extensive application in medical, sanitary, sports, and protective devices, underscoring its remarkable versatility.
