

ALL-IN-ONE LOGISTICS MANAGEMENT

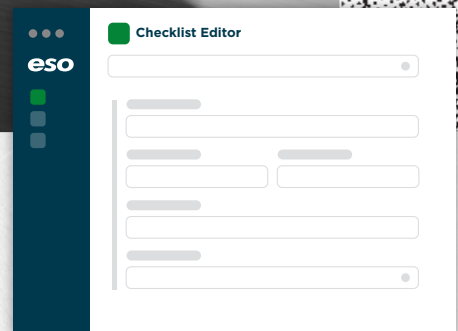

ASSET MANAGEMENT

Maintain care of your capital assets like you would a patient with software purpose-built for today's emergencies, designed to better operationalize assets from procurement to retirement.

INVENTORY

With ESO Inventory, cumbersome mechanisms for ordering and tracking supplies are replaced by technology-enabled methods that flow naturally from daily EMS work routines.

CHECKLISTS

Go beyond the spreadsheet and paper checklists with ESO Checklists - dynamic lists to easily complete and track station, vehicle, and equipment checks from any device.

*available as individual applications or bundled for enhanced functionality.

ESO Logistics Management combines intuitive workflows and three pivotal applications necessary for day-to-day department preparedness: Asset Management, Inventory Management, and Daily Checklists.

eso[®]

Keep your vehicles and equipment operationally ready.

TOGETHER, THESE APPLICATIONS PROVIDE:

- Impressive visibility across departments, agencies, and entities – anywhere at any time.
- Massive cost-saving potential when it comes to controlling and managing your inventory and consumables.
- Simple workflows with just a few clicks between you and complete peace of mind that your equipment, machines, and teams have everything they need every time.

SEE IT ALL

Everything related to your crews' readiness – from consumable stock to equipment checklists – can be seen, accessed, and reported across a department and all related entities.

TAKE CONTROL

Prevent medication expirations, untimely equipment repairs, and wasted dollars by empowering simple and standard processes for your most important assets.

REDUCE COSTS

Minimize waste and spend less on supplies by moving expiring medications to busier locations where they may be used and by keeping supply counts at par to avoid excess inventory.

CONSOLIDATE YOUR PROCESSES

Take the guesswork out of managing assets with a complete catalog of inventory, consumables, tickets, maintenance plans, and costs to your department.

MAKE IT EASY ON YOUR CREW

The workflows are exceptionally simple. Get rid of manual, time consuming, paper-reliant processes for your teams to check, manage, and track crew readiness.

PLAN AND BUDGET FOR YOUR FUTURE

Create reports to improve departmental planning, forecasting, and budgeting – all while saving inventory costs.

IMPROVE PROVIDER SAFETY

Rest assured that equipment is up-to-grade and always meets safety compliance standards for your crews.
