**Airway Management** ▪ Airway Devices

Quality, innovation and choice

[www.intersurgical.com](http://www.intersurgical.com)

In emergency medicine, you need equipment that's easy, rapid and reliable to use. The i-gel O<sub>2</sub> Resus Pack contains everything you need to prepare, insert and secure the i-gel O<sub>2</sub> quickly and efficiently: an i-gel O<sub>2</sub> supraglottic airway, a sachet of lubricant and an airway support strap.

The i-gel O<sub>2</sub> incorporates a supplementary oxygen port and an integral hook ring for securing of the airway support strap.

The i-gel O<sub>2</sub> has been designed to facilitate ventilation as part of standard resuscitation protocols, such as those designated by the European Resuscitation Council (ERC) and the American Heart Association (AHA). However, the i-gel O<sub>2</sub> incorporates a supplementary oxygen port, so that it can also be used for the delivery of passive oxygenation, or Passive Airway Management (PAM™), as part of an appropriate CardioCerebral Resuscitation (CCR) protocol.

## Airway innovation since 2007

i-gel is the innovative second generation supraglottic airway device from Intersurgical launched in 2007. The first major development since the laryngeal mask airway, the i-gel changed the face of airway management and is now widely used in anesthesia and resuscitation around the world.

### The non-inflating cuff

The i-gel gets its name from the innovative soft, gel-like material from which it is made. It is the innovative application of this material that has enabled the development of a unique non-inflating cuff. This means there is

no need for cuff deflation prior to insertion and no cuff inflation after placement in order to secure a seal, which shortens and simplifies the preparation and insertion procedure.

### Insertion

The i-gel O<sub>2</sub> is incredibly easy to use. Insertion is rapid and can normally be achieved in less than 5 seconds, by a proficient user. The simplicity of i-gel O<sub>2</sub> means the insertion technique is instinctive, reliable and does not require or benefit from the insertion of fingers or thumbs into the patient's mouth.

### Fixation

The i-gel O<sub>2</sub> Resus Pack includes a specially designed airway support strap for securing the i-gel O<sub>2</sub> in position. Fixation is easily achieved by sliding the strap under the patient's neck and securing it in place with the hook ring on the collar of the i-gel O<sub>2</sub>. This makes it ideal for use where adhesive tape is unsuitable, such as on patients with facial hair.

## i-gel O<sub>2</sub> Resus Pack

### 15mm connector

Reliable connection to any standard catheter mount or connection

### Proximal end of gastric channel

### Color coded hook ring

To secure the i-gel O<sub>2</sub> in position with the airway support strap

### Clearly displayed product information

For quick easy reference. Includes confirmation of size and weight guidance

### Position guide

(adult sizes only)

### Supplementary oxygen port

For the administration of passive oxygenation as a component of cardiocerebral resuscitation (CCR)

### Gastric channel

Enhances patient safety by providing a mechanism for the management of regurgitant fluid

### Integral bite block

Reduces the possibility of airway channel occlusion

### Buccal cavity stabilizer

Aids insertion and eliminates the potential for rotation

### Epiglottic rest

Reduces the possibility of epiglottis 'down folding' and airway obstruction

### Non-inflating cuff

Eliminates the need for cuff inflation after insertion, allowing easy and rapid insertion

### Distal end of gastric channel

The i-gel O<sub>2</sub> Resus Pack is available in 3 adult sizes and includes:

- i-gel O<sub>2</sub> supraglottic airway
- Sachet of lubricant – for quick and easy lubrication of the i-gel O<sub>2</sub> prior to insertion
- Airway support strap – to secure the i-gel O<sub>2</sub> in position

## Ordering information

The i-gel O<sub>2</sub> Resus Pack contains an i-gel O<sub>2</sub>, with an easily removable inner tray, containing a sachet of lubricant and an airway support strap all packaged in a specially designed clear, sterile, rigid pack. This unique design ensures protection of the contents, both in transit and in storage. The i-gel O<sub>2</sub> has a color coded hook ring to allow quick and easy identification of size. The i-gel O<sub>2</sub> Resus Pack is available in three adult sizes.

Code	Description	Weight	Box Qty.
8705030	i-gel O <sub>2</sub> Resus Pack, large adult – includes a size 5 i-gel O <sub>2</sub> with orange hook ring, sachet of lubricant and airway support strap	90+kg (200+lbs)	6 
8704030	i-gel O <sub>2</sub> Resus Pack, medium adult – includes a size 4 i-gel O <sub>2</sub> with green hook ring, sachet of lubricant and airway support strap	50–90kg (110–200lbs)	6 
8703030	i-gel O <sub>2</sub> Resus Pack, small adult – includes a size 3 i-gel O <sub>2</sub> with yellow hook ring, sachet of lubricant and airway support strap	30–60kg (65–130lbs)	6
